

C.J. PHOTOGRAPHIC SERVICES

It is said that a picture is worth a thousand words. Let us help convey those words, capture your audience and improve your business. A quality image is essential to successfully sell your product in the modern multi-media marketplace, therefore the shot needs to be exceptional. Our photographic services can do just that. We can accurately image your award-winning print piece, web image, original artwork or retail product and supply you with high-resolution digital image files.

What we offer

High resolution photographic image capture with one of our Full-Frame FX Format cameras

Proper studio lighting and trained professionals to handle and take care of any of your photographic needs.

Product shots and installation shots available on-site or off-site for your convenience.

Photoshop work to enhance or modify any new or existing imagery – whether it is for print or multi media

Our goal is to give you the highest possible image quality out there at a fast and reasonable cost...

Please call us for a consultation or estimate any time!

Photographic Equipment

C.J. PHOTOGRAPHIC SERVICES

Photographic Studio

Utilizing our Nikon D800 Full-frame 36 Mega-pixel cameras equipped with a Nikkor AF-S 24-70mm *f*/2.8G IF-ED Full-Frame Zoom Lens, we can produce images that achieve stunning detail and dynamic range. The resolution of these images is perfect for use in everything from printed brochures, website images and large-format graphic displays. If you have an idea that requires images, we have the equipment and skills to help you take it from concept to final piece.

With the Kodak InSite Soft Proofing System, you can check your images for colour and detail, then request retouching adjustments before the high resolution files are finalized. The image files can then be posted to the InSite server or FTP folder for you to download and/or burned to a physical disc for transfer.

Let us show you how we can make your art or product shots come to life and add pop to your marketing materials.
